The Colorado Health Foundation™

Vendor Diversity Registry

As an organization focused on pursuing racial justice to achieve health equity, CHF annually collects and publicly shares data that demonstrates our progress in how we're centering race and ethnicity in our work. The accountability commitments outlined below are designed to show – over time – how our Board of Directors, investments, advisors, partners, grantees and staff encapsulate and represent diverse experiences, perspectives and approaches.

As part of this commitment, we also ask that all consultants complete a demographic survey you see below. We make purposeful efforts to work with diverse vendors in direct alignment with our mission. Vendors include consultants, suppliers and contractors that provide goods and other contracted services.

The purpose of this survey is to learn more about the diversity within your organization. The survey is voluntary. If you decide to take it, the survey specifies which fields are required and allows you to indicate if your organization does not collect this type of information. Only aggregated data will be shared publicly.

Show email for any questions.
