The Colorado Health Foundation™

Local Ballot Measure Tracker

The Foundation monitors local policy decisions across the state – from the Western Slope to the Eastern Plains – to learn more about the issues that shape our health in the different places we call "home." Every year, we partner with the Colorado Health Institute to make a list of city- and county-level ballot measures.

Our local ballot measure tracker is a publicly available one-stop shop that can be used to gain insight into the issues in your community or to track issues statewide. It is continuously updated as new ballot measures are proposed and decided by voters.

Curious to learn more about what's been happening on the local level related to affordable housing? You can either filter for these results on the full tracker below or check out our housing-specific tracker which has done the work for you to zoom in on those specific ballot initiatives. We also invite you to peruse the Housing on the Ballot report which summarizes recent local level trends.

Colorado School Finance Project Tracker

The Colorado School Finance Project (COSFP) is a nonprofit, nonpartisan organization working to compile, collect, and distribute research-based information and data on topics related to school finance and policy analysis for state and local policymakers. In 2010, COSFP began collecting information on local school district elections, including all Bond, Mill Levy Override, and BEST

Matching questions. COSFP actively watches the results and updates as results are finalized. This completed process is ongoing until election results are certified and can be followed on the COSFP website.
