The Colorado Health Foundation™

Affordable Housing Ballot Measure Forum

This November, Coloradans will vote on a ballot measure that seeks to create a permanent fund for the creation of affordable housing across the state. This fund would allocate $300 million annually toward thousands of new housing units across the state. More information on this measure is available here.

On Sept. 20, the Foundation, in partnership with Project Moxie, hosted a forum where sponsors from the "Make Colorado Affordable" ballot measure campaign shared a brief presentation and answered questions about how this new legislation,

if passed by Colorado voters, may impact communities.

This event was open to the public and Spanish interpretation was provided.
