The Colorado Health Foundation™

Rolling Funding

Open Funding

The Colorado Health Foundation accepts applications year-round for the following funding opportunities. There is **no deadline** associated with these applications.

Advocacy Rapid Response Funding

This opportunity supports short-term advocacy initiatives (3–9 months) that ensure Coloradans' interests and priorities are at the center of policy decisions that have long-term impacts on health equity.

Invitation-Only Funding

The Colorado Health Foundation invites eligible and mission-aligned organizations to apply for the following funding opportunities through discussion with a program officer. If you are interested and believe your work is well-aligned, please review the criteria and contact a CHF program officer. Interested applicants must speak with a program officer and receive an invitation before submitting an application.

Affordable Housing

The Foundation offers select funding by invitation only for organizations advancing housing justice across Colorado. We consider projects that: (1) have a foundation for community-driven or community-led action; (2) maintain or promote enduring housing stability; and (3) explicitly advance racial justice and health equity. If you believe your housing project meets these criteria, please connect with a program officer listed here.

Building and Bridging Connections

Building and Bridging Connections funding supports efforts that strengthen social capital and community-building, with the goal of addressing health challenges and advancing health equity.
