The Colorado Health Foundation™

A Public Statement from Philanthropy

The Colorado Health Foundation has joined a broad coalition in signing a public statement affirming the vital role philanthropy plays in supporting the health and well-being of communities across the U.S. As part of the philanthropic sector, we recognize our shared responsibility to invest in solutions that reflect the needs, voices and aspirations of the people we serve. We stand united with organizations nationwide in expressing concern about potential governmental actions that could hinder our ability to fulfill this mission.

The statement underscores a fundamental belief: the First Amendment right to give, as an expression of values and priorities, is essential to the work of philanthropy. At its core, philanthropy must remain free to direct resources based on mission-driven strategies and the lived experiences of the communities it serves. Preserving this freedom is not only a matter of principle—it is critical to the long-term health of Colorado and our nation.
